

DIGITAL MEDIEVAL STUDIES: OMEKA WORKSHOP

Alexandra Bolintineanu, Postdoctoral Fellow in
Data Curation for Medieval Studies

Omeka (omeka.net) is an open-source content management system employed by libraries, museums, and university departments to create online exhibits with rich multimedia options and rigorous metadata.

Join us for a hands-on, collaborative introduction to Omeka. By the end of this workshop, participants will be familiar with Omeka and the Dublin Core metadata standard. Participants will also collaboratively create a digital project showcasing the work of the Dictionary of Old English and then present this digital project during the Toronto Old English Colloquium (Friday, 2 May 2014).

Because this is a hands-on workshop, we can only accommodate a limited number of participants. Please register online at digitalmedievalstudies.wordpress.com.
